The Claude Ecosystem — Quick Reference

Claude is a family of AI products. Understanding the landscape helps you pick the right tool for each task.

Product Landscape

Product	Access	Key Features
Claude Web	claude.ai	Chat, Projects, Artifacts, Deep Research, Memory, Custom Instructions
Claude Desktop	macOS, Windows	Native app, Claude Code built-in, app preview, file system access
Claude Mobile	iOS, Android	Chat on the go, voice input, camera for image analysis
Claude in Chrome	Chrome Extension (Beta)	Browser automation — navigate, click, fill forms, workflow recording
Cowork	Desktop (Preview)	Desktop agent for knowledge workers, multi-step workflows, VM sandbox
Claude Code	CLI, VS Code, JetBrains, Web	Agentic coding: read/write/edit, shell, git, MCP, hooks, skills, CI/CD
Claude API	api.anthropic.com, Bedrock, Vertex	Messages API, tool use, vision, structured output, Agent SDK

When to Use What

Scenario	Best Tool
Quick question, research, writing	**Claude.ai (Web/Mobile)**
Analyze a document or dataset	**Claude.ai (Projects)**
Write, debug, or refactor code	**Claude Code (Terminal/IDE)**
Explore an unfamiliar codebase	**Claude Code**
Automate code review in CI/CD	**Claude Code (Headless)**
Build a custom AI-powered tool	**Claude API + Agent SDK**
Automate browser tasks	**Claude in Chrome**
Create docs from local files	**Cowork**

Subscription Tiers

Plan	Price	Code	Key Limits
Free	$0	—	Sonnet only, ~30-100 msgs/day
Pro	$20/mo	✓	All models, standard usage
Max 5x	$100/mo	✓	5× Pro usage, priority access
Max 20x	$200/mo	✓	20× Pro usage, priority access
Team Standard	$25/seat/mo	—	1.25× Pro, admin tools (min 5 seats)
Team Premium	$125/seat/mo	✓	6.25× Pro, admin tools
Enterprise	Custom	✓	SSO/SCIM, HIPAA-ready, 500K context

Note: Claude Code requires Pro, Max, Team Premium, or Enterprise — or an API key. API usage is pay-per-token (separate from subscriptions).

Available Models

Model	Strength	Context	Best For
Opus 4.6	Most capable	1M tokens	Complex reasoning, architecture
Sonnet 4.6	Balanced	1M tokens	Daily coding, most tasks
Haiku 4.5	Fastest	200K tokens	Quick tasks, high volume

Advanced Model Features

Feature	Description	Developer Use Case
Extended Thinking	Chain-of-thought reasoning, controllable token budget	Complex code analysis, architecture decisions
Multimodal (Vision)	Images, screenshots, diagrams as input	UI review, whiteboard→code, error screenshots
PDF Support	Native PDF processing — text, tables, images	Analyze specs, review documentation
Computer Use	Controls mouse, keyboard, screen	Browser testing, UI automation
Prompt Caching	Cache reusable context blocks, up to 90% savings	High-volume API, repeated analysis
Batch API	Async bulk processing, 50% cost reduction	Bulk analysis, migration, reporting
Extended Thinking	Chain-of-thought reasoning, controllable token budget	Complex code analysis, architecture decisions
